THE COLOUR CHART

Includes our new products

Inspiring... and inspired colours!

For 15 years, we have been working to develop innovative and technical products of decoration. All this to be able to propose you accessible solutions for decoration and internal design projects.

Since the very beginning, besides technicity and quality, creating fine and inspiring colours has been an important and integral part of our brand history.

Forerunners on the emerging market of the BÉTONS CIRÉS (layered polished concrete), our collections helped the concrete to leave its greyness beyond.

Our colour charts are imagined to satisfy any decorative desire and match every environment. From neutral tones to strong and daring colours, guided by a boundless inspiration, we are happy to present you the comprehensive colour chart for our various ranges : Micro-topping Concretes, Decorative Paints, PURE® Metal and Lime products.

Follow us !

Nota Bene

Shades and aspects in our colour chart are indicative and cannot be considered as contractual. When making your choice we advise to use our samples and our hand painted colour charts.

Our advice

Trust yourself and follow your instincts! Do not hesitate to break the rules. A few key principles before you start.

A colour is never alone :

Don't forget that colours react to each other. Their rendering can vary depending on the elements in place (fabrics, furniture ...). So you will create fluidity within your interior by choosing the tones of different rooms in a common spirit. Or you will be able, on the contrary, to provoke a breaking decor by daring strong contrasts!

Play with volumes and spaces:

Nothing like colour to change the perception of a room! Use contrasts to move walls closer or further apart, to make one room seem bigger, to give ceiling height or to reduce it. Opt for monochromy if you want to hide flaws and increase the feeling of space.

Exposure and light, beware!

It plays a major role in the choice of colours. There is nothing like testing the colour in context with our test sizes, taking into account the light of the room (daylight and electric light). For rooms with little exposure, the use of white is not always the best solution. On the contrary, a dense color can create a real atmosphere and give spirit to the place.

The ceilings: white, not necessarily...

Using the same colour on walls and ceilings allows to melt them and avoid the classic demarcation. If you still choose white, it is to be chosen carefully according to your wall color.

Rendering Material, Rendering Color

All the materials used, with nuanced effects, such as our Waxed Concrete, PURE® Metal, Lime... have a colour rendering that may vary slightly depending on the gesture of the applicator, the tool used and the finish chosen.

What about the floor?

Medium tones are usually easier to maintain. White and light or dark tones require more care.

Try them out!

Trial sizes and material samples are available to help you make your decision and avoid colour errors. Depending on the project, we recommend that you do a test on a sheet, cardboard or other material, in order to visualize the colour and material rendering at different times of the day and on each wall section of the room.

Cold Metallisation Process

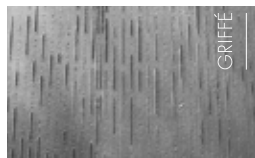

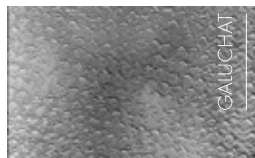

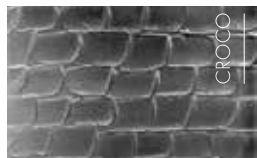

PURE® Métal

Ideal For: Wall, furniture, countertop, stairs, floor, bathroom (except shower).

A multitude of possible effects

For even more marked effects, PURE® Métal can be applied with different tools : a knife, a trowel, a spatula, a roller, a brush, a spray gun... but also accessories to obtain a textured finish (bubble wrap, a piece of cloth, a fork, a spiked roller...).

Decorative Paints

The Mercadier® Collection

Ideal For: every project, available in 3 finishes.

Miccro Topping Concretes

	Coloured concrete - EBC	PURE® Minéral Béton - PMB
DESCRIPTION	Decorative finishing mortar, coloured in its mass.	Decorative coating made from cement, lime and mineral fillers.
AESTHETIC RENDER	Textured or uniform depending on gestures at application.	Slightly nuanced, colour chart with softened shades.
IDEAL FOR...	Indoor / outdoor : wall, floor, italian shower, countertop, wash-basins, bathroom.	Indoor : wall, italian shower, countertop, wash-basins, bathroom.
PROPERTIES	Exceptional grip on the majority of surfaces. Waterproofing properties.	Thin grain. A soft and smooth texture and a longer application time facilitate the application.
APPLICATION AREA*	<ul style="list-style-type: none"> • Applied in 2 to 3 layers of small thickness on any surface: tiles, cement, plasterboards, aerated concrete... • Suitable for low temperature heated floors. • For high-traffic areas, choose the Self-leveling Floor AXXX. • Usually applied in 1 to 2 mm. 	<ul style="list-style-type: none"> • Applied in 2 or 3 layers on the surface after preparation (plaster, old tiles, cellular concrete, cement, wooden derivatives...). • Can be used either on new or old surfaces. • Apply on a thickness from 1 mm (decorative wall) to 2mm (technical room).
TECHNICAL PROPERTIES	Resistance to fire: ranking B _{fl} Resistance to compression: C50 Resistance to bending: F10	Permeable to water vapor Resistance to abrasion

Self-leveling and self-smoothing floors

	AXXX	SC+	RBX®
DESCRIPTION	Coloured in its mass, based on calcium sulphate.	Coloured in its mass, fusion of cement and mineral fillers.	
AESTHETIC RENDER	Extremely smooth, ultra-fine grain and soft-touch.	Tight and silken aspect, very fine grain.	Crude mineral aspect, open space and industrial spirit.
IDEAL FOR...	Interior floors of vast areas (except damp room), adapted for high-traffic public areas.	Interior floors of vast areas (suitable for all rooms in the house), adapted for high-traffic areas.	
PROPERTIES	Very high mechanical resistance to wear, high hardness, low tension, fast drying, applied in 3 to 10 mm of thickness.	Decorative properties and unique finish, rich in mineral fillers, strong resistance to wear, ideal for high-traffic areas, applied in 4 to 10 mm of thickness.	
APPLICATION AREA*	Applied in one go on any usual surfaces: concrete/cement screed, fiber screed and existing tiles without removal (contact us), suitable for low temperature heated floors, may be applied on anhydrite screeds after special preparation (see technical data sheet).		
TECHNICAL PROPERTIES	Resistance to fire: raking A1 _f Resistance to compression: C40 Resistance to bending: F10	Resistance to fire: raking A1 _f Resistance to compression: C30 Resistance to bending: F6	Resistance to wear BCA: maximum ranking AR0.5 reached Firmness/resistance Shore: ranking SH 200 reached
