

Cleaning Shampoo for Aqua Varnish

Information and Technical Support: export@mercadier-group.com

PRODUCT DESCRIPTION

Active cleaner to clean decorative concrete floors protected with Aqua Varnish.
Excellently captures specs of dirt, even grease stains.
Does not scrape the surface and does not create any grayish film. Does not leave any traces.

NECESSARY TOOLS

Bucket, floor cloth

APPLICATION

For routine maintenance dilute the Shampoo in the following proportions: 25 ml with 5 litres of water.
Clean the floor with this solution using a floor cloth (which must not be soaked).

TIPS

Avoid moistening delicate surfaces (woods, metal, and furniture) with the cleaning solution.

CONSUMPTION AND PACKAGING

100 ml for 100 m² - Cans of 750 ml

RECOMMENDATION AND WARNING

- See the most recent version of this technical specification (see website). Our distributors and technical support are at your disposal for any clarification.
- Performance and durability guarantees for the decorative coating may be given only in case a complete system of MERCADIER products is used (primer, product itself, sealer) and strictly according to instructions for application and maintenance of the system. Thus, the manufacturer will not be liable for poor product's performance if an application did not conform to our instructions and if the integral system was not used.
- All the information, tips and advice relative to final illustration of MERCADIER products are given in good faith. They are based on knowledge and experience that MERCADIER has acquired so far regarding its products that were appropriately stored and handled, and applied in normal conditions. In practice, the differences between materials, surfaces and specific application conditions are such that provided information, written recommendations or given advice do not imply any warranty of merchantability other than the legal warranty against hidden defects.
- Colours and aspects in our colour charts are indicative, and cannot be considered as contractual. The same is applied for boards and panels displayed at retail outlets. It is preferable to use identical samples as much as possible. These products lead to results with subtle differences that can also arise depending on application conditions (applicator's gestures, temperature etc).
