

ANTIFOAM STERILIZER

PRODUCT DESCRIPTION

Odorless, low-VOC biocide* for indoor and outdoor use based on a mixture of chlorine and methyl in aqueous dispersion.

The ANTIFOAM STERILIZER has been designed to minimize its impact on the environment both in its manufacture and in its use.

Protects aqueous systems sensitive to divalent metal ions. The ANTIFOAM STERILIZER has a wide range of action against bacteria and mold. It is indicated for pre-treating finished surfaces with aqueous-based products such as paints, polymer emulsions, lacquers, whitewashes, coatings, etc.

IMPLEMENTATION

Preparation of supports

The supports and their preparation will comply with the rules of the art and the DTU in force (clean, dry, non-friable and free from salts, humidity and mold).

INSTRUCTIONS FOR USE

Shake well before application.

Ready to use, applied with a brush or roller.

Dry after approximately 4-6 hours. Recoatable after approximately 24 hours. The product must be completely dry before applying the finish.

Avoid applying this product to hot surfaces and/or surfaces directly exposed to the sun, on windy days, on damp surfaces or in the rain.

Consumption: approximately 0.1 kg/m² per coat

RECOMMENDATIONS

This product is slightly irritating to the skin. It is nevertheless advisable to observe the usual precautionary measures for handling chemicals. Wear eye, face and respiratory protection. In case of contact, rinse thoroughly with water and consult a doctor if symptoms persist. Do not dispose of residues in the drain. Keep out of reach of children.

CLEANING AND CONVERSATION

Clean tools with water. Apply and store at temperatures between 5°C and 35°C. Store for 1 year in its original sealed packaging in a dry, frost-free place.

Packaging of 1 kg and 10 kg.

*"Biocides are active substances and preparations containing one or more active substances, presented in the form in which they are supplied to the user, which are intended to destroy, repel, render harmless, prevent the action of, or otherwise combat harmful organisms by chemical or biological action." According to Directive 98/8/EC of the European Parliament and of the Council of 16 February 1998.

The information contained in this sheet is an expression of our knowledge and test results; it cannot under any circumstances be considered as providing a guarantee or engaging our liability in the event of defective application. It is recommended to carry out a control surface.
