

AQUA VARNISH POLISH STAIN REMOVER

PRODUCT DESCRIPTION

Universal stain remover for soluble stains (or even water-insoluble stains: test beforehand) on Bi-Aqua Varnish.

Particularly suitable for removing rubber abrasions and shoe marks.

NECESSARY TOOLS

Absorbent cloths/Sponge

IMPLEMENTATION

First, remove any remaining liquids by dabbing with an absorbent cloth, then vacuum up any loose dirt.

Spray the stain remover onto a soft, absorbent, lint-free cloth. Dissolve the stain by dabbing from the edge towards the center. Remove the dissolved dirt with a corner of a dry cloth.

Next, treat the area with clean water and pat dry.

NOTICED :

Do not allow the stain remover to stagnate.

Always test the stain remover in an inconspicuous area.

PACKAGING

200ml bottles.

RECOMMENDATIONS AND WARNINGS

- Consult the most recent version of this technical data sheet (see website). Our Distance Selling department and our resellers are available for any further information.
- Guarantees of product performance and longevity can only be obtained when using the complete Mercadier range system (primer, 'concrete', and finish) and strictly adhering to the technical data sheets and maintenance recommendations. Therefore, we cannot be held liable in any way for applications that do not conform to our instructions or that do not utilize the entirety of our system. The information, tips, and advice regarding the end use of MERCADIER products are provided in good faith. They are based on the knowledge and experience that MERCADIER has acquired to date with its products when they have been properly stored, handled, and applied under normal conditions. In practice, the differences between materials, substrates, and specific site conditions are such that this information, or any written recommendation or advice given, does not imply any guarantee of merchantability other than the legal guarantee against hidden defects. The colors and finishes shown on our color charts are indicative and not contractually binding. The same applies to the panels displayed in stores. Whenever possible, it is preferable to use identical batches. These products have a nuanced final appearance that can also vary depending on application conditions (applicator technique, temperature, etc.).

SAFETY AND PRECAUTIONS

Components: <5% anionic surfactants, bleaching agents, oxygenated agents. Contains solvents, perfumes, limonene, stabilizers.

Store in its original closed packaging in a cool, dry place.

Keep locked up and out of reach of children.

The information contained in this document reflects our current knowledge and test results; it cannot under any circumstances be considered as providing a guarantee, nor as engaging our liability in the event of defective application.
