

SOFT BLACK SOAP

FEATURES

Genuine SOFT BLACK SOAP with 99% natural olive oil, made according to ancient Moroccan traditions using olive paste, water, and sodium hydroxide. **BLACK SOAP** owes its natural coloring to olive paste; it contains no coloring, preservatives, or solvents; it is a completely ecological and biodegradable product.

It can be used in a variety of ways, and can replace ten cans of conventional cleaners:

- For household cleaning (dishes, laundry, floors, windows, etc.), to degrease, remove stains and nourish materials (tiles, terracotta, parquet floors, marble, ceramics, porcelain, etc.).
- For the treatment of insects (mites, aphids, scale insects, etc.).
- For the hygiene of domestic animals, natural shampoo, washing of cow and goat udders.
- To protect limewash, plaster and stucco, to finish Tadelakt and to clean brushes.

INSTRUCTIONS FOR USE

- **Housekeeping**

For small surfaces, a dab of **BLACK SOAP** on a damp sponge is more than enough.

For larger surfaces, dilute two to three tablespoons of **BLACK SOAP** in five liters of water.

For a stain on clothing, apply a small amount of **SAVON NOIR** directly to the dry garment, rub lightly then put in the washing machine.

- **Insect treatment**

Dilute a little **BLACK SOAP** in hot water and spray the mixture directly onto the affected areas.

- **Pet hygiene**

Dilute two to three tablespoons of **BLACK SOAP** in five liters of water.

- **Decoration**

Dilute two to three tablespoons of **BLACK SOAP** in five liters of water.

To finish and protect lime stucco, apply the solution with a brush to the still-fresh smooth plaster, then finish with a roller or trowel.

To protect limewash and plaster, apply the solution with a brush to the dry surface, adding a little water if necessary to avoid brush marks.

However, be aware that applying the **BLACK SOAP solution** will slightly darken the initial shade and give a slightly satiny appearance.

To clean brushes, soak them in the **BLACK SOAP solution**.

CONSERVATION

BLACK SOAP can be stored for 1 year in its original, tightly closed packaging, away from frost and extreme heat.

PACKAGING

BLACK SOAP is sold in 1 kg and 10 kg plastic jars.
